

Global Ambulatory Infusion Product Catalogue

For home, pain management
and oncology treatments

Who are BD?

BD is a global medical technology company that is *advancing the world of health* by improving medical discovery, diagnostics and the delivery of care. BD is leading in patient and healthcare worker safety and the technologies that enable medical research and clinical laboratories. We provide innovative solutions that help advance medical research and genomics, enhance the diagnosis of infectious disease and cancer, improve medication management, promote infection prevention, equip surgical and interventional procedures and support the management of diabetes. BD offers infusion and intravenous (IV) therapy systems, solutions and devices including pumps, software, interoperability, IV sets and accessories.

There for you - service and support

Our team of skilled, dedicated and passionate clinicians and technicians support both healthcare workers and patients using our devices.

Technical Support

Our field-based technical service team is the center of excellence for the repair, service and calibration of your devices. Our qualified engineers have a complete understanding of the device, down to component level,

and are able to offer the highest levels of quality when servicing or repairing your devices.

Clinical Support and Education

To ensure our products are safe and easy to use for patients and clinicians, our team of trained professionals offer device user training. To support the provision of safe and efficient care in hospital, in the community or at home, our dedicated, knowledgeable and attentive customer support team is committed to getting it right, on time, first time, every time. Whether you are a clinician, an engineer or a patient using our products or services, our team of experienced customer support professionals are available to deal with your enquiry.

Our commitment to you

Patient Safety

At BD, we are committed to patient and medication safety. We understand that each and every healthcare provider is unique and we have the knowledge, insight, skills and experience to support our customers with improving patient safety.

BD BodyGuard™ infusion pump specifications

Dimensions and weight

Weight (with standard battery) 410 g

Pump only (H/W/D) 112 x 89 x 40 mm

Wide flow rate range

0.1 - 1200 ml/h

Piggyback (Secondary) 0.1 - 1200 ml/h

Bolus 0 - 1200 ml/h

KVO Rate 0 (OFF) - 20 ml/hr

Flow rate accuracy* ± 5 %

Volume to be infused

0.1 - 9999 ml

Patient safety

Ultrasonic Air Sensor Air bubble size 0.04 – 2 ml

Occlusion Pressure 100-1500 mmHg (10 mmHg increments)

Programmable infusion time (Dose over time)

100 hrs

Complies with the current version of the following standards

IEC 60601-1, IEC 60601-1-2, IEC 60601-1-6, IEC 60601-1-8, IEC 60601-1-11, IEC 60601-1-12, IEC 60601-2-24

Protocols library

Fully programmable drug library, with automatic calculation of drug concentration programmable via PC with BodyComm™ software**

Up to 128 drugs referred to as protocols

2000 user events log

Power supply

110-240 VAC, 50/60 Hz. 0.3A max

Battery specifications

Rechargeable Li-Polymer 7.4 V Battery

1800 mAh.

Rate (mL/h)	Approx. Battery life (hours)
25 & 125	15
1200	8
3600 mAh. Life at 125 ml/h (optional) up to 30 h	

Pump alarms/alerts

Air in line / Up Occlusion, Down Occlusion, Near End Program, End Program / End of Infusion, Low Battery, End Battery, Pump Unattended, Door Open, System Error, Missing Set Key, with the use of flow sensor accessory

Ports

1 x RJ45 – for drop sensor

1 x RS232 (Male) – for PC communication

Additional specifications

Insulation class II, type CF

Ingress Protection: IP33

Linear Peristaltic mechanism

* Achieved under nominal conditions
** Only trained CME or BD associates or authorized representatives are allowed to configure BD BodyGuard™ infusion and syringe pumps and upload the clinician-approved protocols to supported pumps.
† Each order code contains several languages in addition to the primary language. Check with your local representative on product availability.

BD BodyGuard™ Duo

Optimized drug delivery through simple workflow, safety, and reduced medication leftover.

With 2 infusion channels, a single simplified user interface, and true concurrent flow capability, the BD BodyGuard™ Duo infusion system addresses the needs of high intensity multi-channel infusion environments such as out-patient medical oncology, patient transport, and general infusion therapy. The BD BodyGuard™ Duo and BD BodyGuard™ MicroSet systems offer flexibility and convenience to both healthcare worker and patient by helping free up nurse time, helping ensure adherence to medication protocols, improving workflow efficiency, and helping reduce equipment cost and footprint.

BD BodyGuard™ Pain Manager

Pain management solutions

Designed around patients, the BD BodyGuard™ Pain Manager is an ambulatory infusion pump that offers a number of pain management modes to help improve quality of life and patient comfort. The BD BodyGuard™ Pain Manager infusion pump has 3 configurable modes: PCA, epidural and regional. It can be set to patients’ needs or clinical specialty via different infusion modes: continuous only, bolus only, continuous plus bolus, and auto bolus. The BodyGuard™ Pain Manager infusion pump can be used for infusion through intravenous, subcutaneous, epidural, regional and wound infiltration routes.

Infusion Modes

- PCA
- Epidural
- Regional

Multiple Delivery Methods

- Basal only
- Basal & bolus
- Bolus only

Multiple Bolus Types

- Patient bolus
- Auto bolus
- Patient bolus combined with auto bolus

MediGuard™ Weight-based Dosing Software

Fully Programmable Drug Library

BD BodyGuard™ Epidural

Epidural solutions

Designed around patients, the BD BodyGuard™ Epidural infusion pump offers specific pain management modes to help improve quality of life and patient comfort. This latest edition of infusion pumps, specifically designed to meet clinicians’ needs, will help you meet the strict demand of epidural. The BD BodyGuard™ Epidural infusion pump has features that help make even the most challenging regimes safer and simpler to infuse.

BD BodyGuard™ MicroSets

BD BodyGuard™ MicroSet range

17

We offer a wide range of infusion sets that are specifically designed to optimize the outcomes of the different therapies administered with the BD BodyGuard™ infusion pumps. From basic administration, to specialty sets for TPN, PCA, Epidural, Regional Anaesthesia and Oncology.

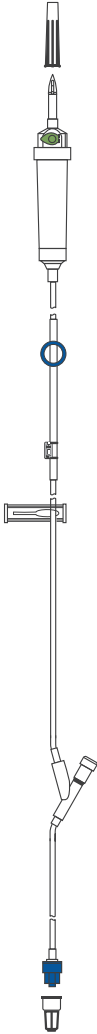

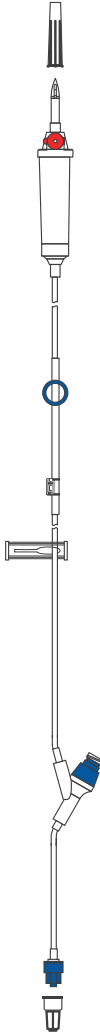

Features of the range:

- All the sets have a microbore tubing (1.6 mm of inner bore) that translates into low priming volume
- As a safety feature, in all sets there is an anti-syphon valve that prevents against free flow and back flow*
- Filter sets with a 0.2 and 1.2 micron size for the use with specific drugs or TPN therapy
- TPN set with a manual priming valve, a by-passable anti-syphon valve
- Color-coded sets for each therapy care area
- PCA sets blue and blue striped
- Epidural sets yellow and yellow striped
- Regional anaesthesia sets grey and green
- Light resistant sets to be used with light sensitive drugs
- NRFit™ sets according to the new ISO standard (80369-6) to prevent missconnections in regional anaesthesia care setting
- Low sorbing oncology sets designed for the administration of multiple secondary infusions through the SmartSite™ ports

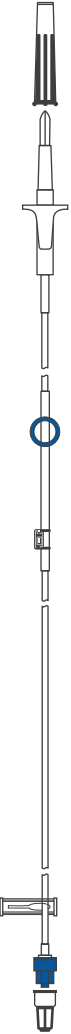

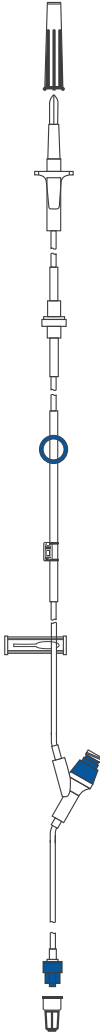

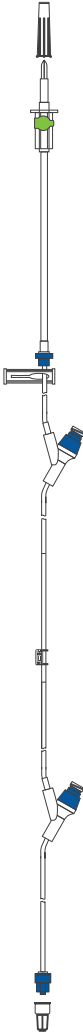

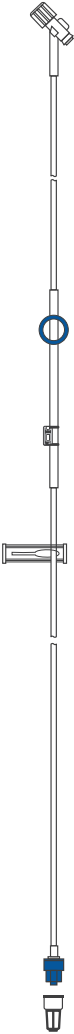

*Except the secondary sets and extension sets that have a back check valve. Check with your local representative on product availability.

Accessories

Accessories

Improving patients’ lives with enhanced mobility

Every setting our equipment is used in is as unique as the patients who use it. We know that, in every situation, mobility is crucial – so, we help enable a breadth of therapies to be delivered in a way that allows patients to get on with their lives.

A wide variety of accessories, accompanying sets and cradle charging attachments offer the ultimate flexibility.

Pouch/Bag

BD BodyGuard™ T Pouch

To carry pump, medication and lockbox while infusing

Product Code	Size (mm)	Weight (g)
100-176S	250x130x60	145
